

Practitioner's Price List
Extracts & Skin Care

Summer 2022

It has often been demonstrated to you that some of the remedies are found by reason (logos) alone, some by experience (peira) without using reason, and some need both working together. And further, that concerning those which have been detected by reason and experience together, a method of exploration is used for finding what is sought, and that those which are assumed by reason are confirmed by experience.

— Galen of Pergamum

Galen's Way is committed to crafting the highest quality herbal extracts for the practitioner market. We carefully select our ingredients for purity and quality applying experience, traditional methods and modern science to produce robust whole plant extracts.

Our extracts are generally prepared from dried plant material, with a few important exceptions, and represent a concentrated plant constituent profile. All extracts are produced using organic gluten-free cane alcohol.

Our facility operates under current cGMP and is certified organic by CCOF. As required by FDA common name usage follows Herbs of Commerce 2nd Edition published by the American Herbal Products Association.

Galen's Way skin care lines utilizes whole-plant infused oils to produce unique and effective therapeutic preparations. They are truly a joy to create and reflect an herbal tradition intimately connected to the spirit of plants.

Sourcing responsibly harvested and organic ingredients, we acknowledge the intricate coupling of environmental and personal health. We stand behind our products as the best of their kind on the market.
